Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

How might we [your problem statement]?

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and tell the pencil (or fish) to sketch a new sketch drawing.

Surya SK

A. To maintain statistical record of companies growth, income, etc.,

The statistical details like GDP, economy etc can be stored in cloud so that it can be accessed at any instance for reviews or references.

C.To use service registries in Electronic business using XML.

Register contains services done in website, purchases records of an application, user management can be handled.

Dheyaneshwaran S

B.To check with the patients health status in hospitals.

Records of patient regarding previous operations done, injuries, etc., can be accessed with this registry at any hospital connected to the service registry.

Rajesh Kanna K

D.To get the feedback from the users in a webservice.

To keep a track of the performance of a website or application by getting feedback from the user that helps in improving the application or website better.

Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

A.To maintain statistical record of companies growth, income, etc.,

- To keep track of previous data, information etc. for better understanding.

B.To check with the patients health status in hospitals.

C.To use service registries in Electronic business using XML.

D.To get the feedback from the users in a webservice.

TIP
Add customizable tags to slide notes to make it easier to find, leverage, organize, and categorize important ideas as known within your mind.

To keep a track of the performance of a website or application by getting feedback from the user that helps in improving the

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 20 minute
